

Angular CLI

Alex Thalhammer

Angular CLI

- Introduction to Angular CLI
 - Important commands

Introduction Angular CLI – I

- `npm i @angular/cli`, then „ng“ → not possible use „npx ng“
- Used to initialize, develop, scaffold and maintain NG apps (and libs)

Introduction Angular CLI – II

- ng / ng help
- ng new cli-project, cd cli-project, ng serve (s)
- Workspace and project configuration in “angular.json”

Important commands (angular.io/cli)

- ng build (b)
- ng lint (l) or test (t) or ng e2e (e)
- ng generate (g) component/service/... (based on schematics)
- ng update → updating your angular version (update.angular.io)
